

Thank you for selecting JELD-WEN products. Verify that all parts of the shelf kit are present and undamaged before installation.

IMPORTANT INFORMATION

Kit Includes

One shelf (with adhesive tape pre-installed)

For best results, finish door and shelf prior to installation (if not already finished) according to JELD-WEN finishing instructions found at www.jeld-wen.com. If applying the shelf to a door that is already finished, verify the finish is in good condition before applying the shelf. Re-finish the door if necessary.

SAFETY AND HANDLING

- Read and fully understand **ALL** manufacturers' instructions before beginning.
- Wear protective gear (e.g., safety glasses, gloves).

- For proper adhesion, only apply to the door when conditions are dry and at least 50°F. Move the door into favorable conditions if necessary.

IF INJURY OCCURS, IMMEDIATELY SEEK MEDICAL ATTENTION!

MATERIALS AND TOOLS

- Padded flat surface (optional)
- Tape measure
- Pencil
- Finishing supplies
- Clean lint-free paper towels
- Isopropyl alcohol

PREPARE SURFACE

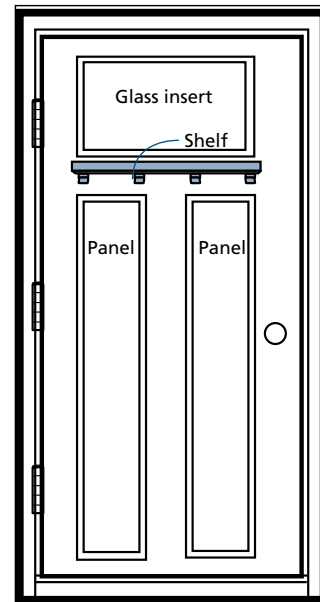

1. The shelf can be installed on the door with the door either vertical or horizontal. Installation may be easiest if the door is placed on a flat padded work surface with exterior side facing up.
2. Clean the entire surface as shown in the image to the right where the shelf will be installed. Use a clean towel and Isopropyl alcohol and let dry.

INSTALL SHELF

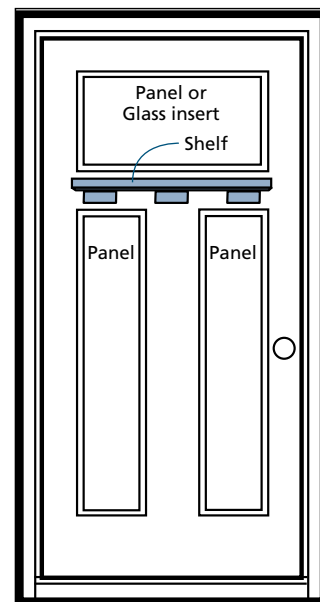

1. Center the shelf vertically and horizontally on the cleaned surface and lightly trace each shelf corner on the door.
2. Remove the backing paper from the pre-installed adhesive tape. Once the tape adheres to the door, it cannot be moved. Ensure the shelf is in the correct position before contacting the door surface.
3. Align the shelf with the marks on the door and press the shelf firmly into place and hold for 15 seconds. **DO NOT** disturb for 72 hours.

NOTE: The shelf is decorative only and not designed to support weight.
