

The drawings shown illustrate the maximum and minimum heights allowed for when reducing the height of standard doors by the factory. Doors are built to the requested size and added to your standard order. Please allow an additional three (3) days beyond our normal lead times for custom height exterior doors. Because a standard skin is cut down, the bottom and/or top rail heights will be reduced. Review the resulting design appearance and hardware needs with the customer before ordering. See pricing information for costs.

### Doors 3' 0" x 6' 8" – Height Reduction Schedule

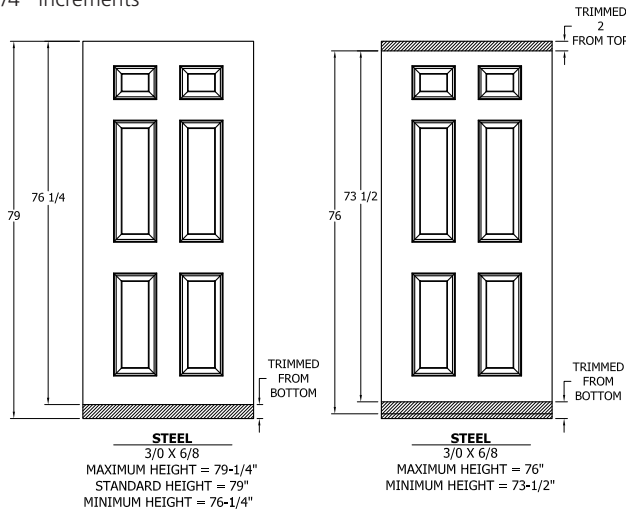

#### 79" to 76 1/4" heights (Door is cut down from the bottom)

- 1/4" increments

**Note:** Maximum door height is 80"

#### 76" to 73 1/2" heights (Door is cut down from the top and bottom)

- First 2" are taken from the top of the door
- 1/4" increments

#### Notes:

Drawings not to scale

Reference Elevation/Section drawings on [jeld-wen.com](http://jeld-wen.com) for design rail dimensions
